Office Action Summary

Art Unit: 3753

This action is responsive to the communication filed February 23, 2001.

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 3753.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: one fluid and two 2 type devices

Species B: two fluids and two 2-3 type devices

Species C: two fluids and one 2-3 type device and one 2-3-3 type device

Species D: Figure(s) two fluids, a bypass and two 3-3 type devices

Species E: Figure(s) two fluids, an evacuating channel, a bypass channel, a 3-3 type device and a 3-3-3 type device.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no

Art Unit: 3753

generic claim is finally held to be allowable. Currently, claim 1 appears to be generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

It should be noted that some of the species listed above may not currently be specifically claimed. However, such unclaimed species are listed at this time in the interest of expediting prosecution in that applicant may identify and elect **any** single disclosed species and to present claims drawn thereto. Moreover, there may be other species present than those listed above such as disclosed but unillustrated variations and applicant may also identify and elect such other species.
